

## (Re-)Documentation – System Usage

Get the big picture

SAP systems undergo change – because of enhancements, upgrades or any type of modification. More often than not, events like company mergers and the consolidation of multiple systems render your documentation obsolete. Employee turnover further adds to gaps in knowledge about system usage. Your SAP landscape becomes stagnant – technical and business-critical advancement stunted.

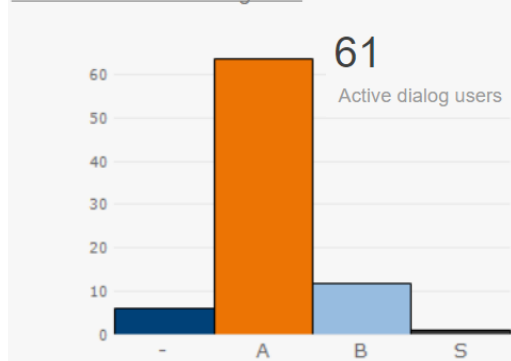

To make the most of your SAP system, you need to know exactly what's going on inside. The analysis of system usage gives you this visibility. It examines actual usage at application level, delivering reliable data from an objective source – allowing you to assess process efficiency and discover how employees in all departments are really using programs, transactions and processes.

### > YOUR NEED

- To create up-to-date documentation of your system usage
- To familiarize yourself with actual system usage for an acquired system
- To properly document previous consolidation of multiple systems
- To get to know “your” system, as CIO
- To create up-to-date documentation of system usage as the basis for
  - an imminent upgrade to a new release
  - additions to business-related functionality
  - any scenario that requires accurate and up-to-date documentation of your system usage

## > YOUR BENEFIT

- Simplifies and accelerates the training of new employees in your organization
- Mitigates risk when employees with key knowledge leave the company
- Saves time and expense when creating application-specific documentation
- Delivers visibility into the implemented SAP systems and insight into usage across all relevant user departments
- Displays data on key metrics, obtained from a reliable source
- Lays the groundwork for follow-up projects such as
  - upgrades
  - clean up
  - harmonization
  - automation
